

# Cover Crops

Cover cropping is not just for livestock and organic producers. Cover cropping can be used to break disease, weed, and insect cycles, break up hard pan, capture leached nutrients, set up for "on time" winter cereal seeding, but also can set up short term pastures, green feed crops, and crop diversification. Cover crop blends will vary with your goals and needs. The result is healthy soils and reduced risk.

Species to be considered:

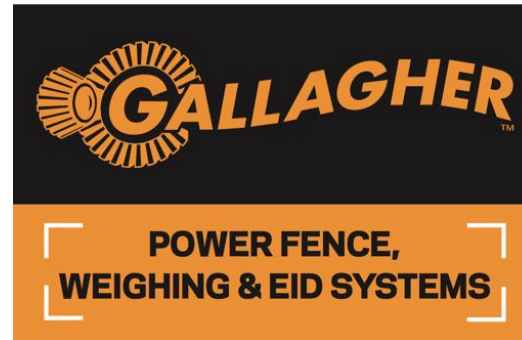

Tillage Radish®  
Hybrid brassica  
Turnip

Crimson Clover  
Hairy Vetch  
Peas  
Red Clover  
Yellow Blossom Sweet Clover

Annual ryegrass  
Winter triticale/fall rye  
Oats  
Barley  
Sorghum Sudan  
Millet

Sunflowers  
Sugar beet  
Buckwheat

This is not a complete list, but a starting point. The blend can be as simple or complex as you wish.

We grow and trial the crops we sell. We aim to create cropping management systems that are sustainable and profitable for our customers. Our success is your success.

We will have Luoma Winter Triticale available in August 2015.

# Soybean

## TH 33003 R2Y

Relative Maturity 0.03

Very daylight sensitive for maturity

Tall plant

Slender type

IDC 1.7

Well adapted for east central SK

Grown on our farm for 3 years

## TH 32004 R2Y

Relative Maturity 0.04

Medium Height

Semi-bush plant

IDC 1.7

High yielding but should be grown south of Qu'appelle Valley

## TH 35002 R2Y

Relative Maturity 0.02

Medium height

Semi-bush type

IDC 1.8

Above average spring vigor

Limited seed supply

# Corn

## Silage and Grazing
